ABOUT ME

Software Engineer with hands-on experience building full-stack web applications using the MERN stack and modern frameworks such as Next.js and React. Skilled in developing RESTful APIs, designing scalable database solutions with MongoDB/MySQL. Proven ability to deliver production-ready solutions in both independent and collaborative team settings. Eager to learn more and expand my tech stack.

SKILLS

- Languages: HTML, CSS, JavaScript, TypeScript
- Frameworks & Libraries: React, Next.js, Express.js, Socket.io, Tailwind CSS, ShadCN UI, Chakra UI,
- Databases: Firebase, Supabase, MongoDB, MySQL
- Tools & Practices: Git, Agile, Slack, Postman, Figma, Canva, Claude Code, ChatGPT, VS Code

EXPERIENCE

Nerve Technologies

Junior Software Engineer

October 2024 - September 2025

- Delivered enterprise web applications using the MERN stack, ensuring scalable and maintainable solutions for client needs.
- Built responsive React user interfaces with SCSS/Tailwind CSS and Ant Design, providing consistent design and improved usability.
- Developed secure RESTful APIs with JWT authentication and implemented database operations with Prisma, Sequelize, and Mongoose, while integrating real-time features with Socket.io for interactivity.

Techmaker Digital Innovations

Web Developer (Part-Time)

October 2024 - Present

- Designed and implemented a contract management application with Next.js, Chakra UI, and email system using Nodemailer, enabling efficient contract creation and tracking.
- Contributed to the e-commerce platform specializing in cinema equipment sales, implementing product catalogs, shopping cart functionality, and Firebase integration with admin inventory management.

Unified Internship Program Incorporated

Web Developer Intern (Team Leader)

March 2024 - July 2024

- Led a small development team in building a travel agency booking system with WordPress and WPTravelEngine, improving reservation workflows for clients while gaining experience in team coordination.
